Senior Cloud Engineer | AWS | Azure | Terraform | Cloud Infrastructure

Summary

Senior Cloud Engineer with 5+ years of experience designing, deploying, and supporting cloud infrastructure across AWS, Azure, and hybrid environments. Experienced in Infrastructure as Code (Terraform), cloud architecture, automation, security, cost optimization, and scalable cloud-native solutions. Proven track record building production cloud environments, reducing infrastructure costs by 40%, improving operational efficiency, and supporting highly available enterprise platforms. AWS, Azure, and Google Cloud certified with strong expertise in cloud operations, platform modernization, and infrastructure automation.

Skills

AWS, Azure, GCP, Terraform, Infrastructure as Code (IaC), Cloud Architecture, Cloud Infrastructure, EC2, ECS, Application Load Balancer, Auto Scaling, CloudWatch, Azure Kubernetes Service (AKS), Azure Container Registry, Docker, Kubernetes, Linux, GitHub Actions, Azure DevOps, Cloud Migration, Cloud Cost Optimization, Infrastructure Automation, Cloud Security, Monitoring, High Availability, Disaster Recovery, Networking.

Experience

Senior DevOps Cloud Engineer

Vibes Meet LLC | Remote | Mar 2025 – May 2026

- Designed and deployed production AWS infrastructure using Terraform, including EC2, Application Load Balancers, Auto Scaling Groups, and CloudWatch monitoring.
- Built scalable cloud environments to improve system reliability, availability, and infrastructure maintainability.
- Reduced AWS cloud infrastructure costs by approximately 40% through EC2 rightsizing, unused resource cleanup, and stronger infrastructure governance.
- Created reusable Terraform modules and architecture documentation to standardize cloud deployments across environments.
- Supported secure cloud operations through infrastructure monitoring, access controls, runbooks, and deployment automation.

Site Reliability & DevOps Engineer

Qore Inc | Oct 2019 – Apr 2024

- Supported cloud infrastructure and Kubernetes-based workloads across Azure environments.
- Implemented GitOps-based microservices deployments to Azure Kubernetes Service using Argo CD and Helm Charts.
- Managed Azure Container Registry workflows and automated container version updates for production Kubernetes workloads.
- Built Prometheus and Grafana dashboards to improve visibility into service health, performance, and availability.

- Supported release orchestration across Bitbucket, Azure DevOps, and Octopus Deploy to improve deployment reliability across cloud environments.

Education

Cloud Computing Technologies — George Brown College, 2024–2025

Bachelor of Science in Computer Science — Madonna University, 2015–2019
